

**2023 Spring
Mathematical Contest in Modeling (MCM)[®] and
Interdisciplinary Contest in Modeling (ICM)[®]
Press Release—July 14, 2023**

COMAP is pleased to announce the results of the 2023 Spring MCM/ICM Contest, 4,025 teams representing institutions from fourteen countries/regions participated in the contest. Five teams from the following institutions were designated as OUTSTANDING WINNERS:

**Northeastern University at Qinhuangdao, China
(COMAP Scholarship Award)**
Sun Yat-Sen University, China
**University of Science and Technology of China, China
(AMS Award)**
Wuhan University, China
Xi'an Jiaotong University, China (Frank Giordano Award)

This contest ran over a single weekend from Thursday, March 30 to Monday, April 3, 2023. During that time, teams of three students researched, modeled, and wrote a solution to an open-ended real world modeling problem. The 2023 Spring MCM/ICM was an online contest, where teams registered and obtained contest materials through COMAP's MCM/ICM Website.

The 2023 Spring MCM/ICM problems represented a variety of challenging problems spanning the familiar to new. Each problem required teams to apply unique mathematical modeling skills to answer the questions posed. Teams participating in the Spring MCM/ICM contest chose to complete either an MCM problem (Problem Y: Understanding Used Sailboat Prices) or an ICM problem (Problem Z: The Future of the Olympics). Both problems were created by the MCM/ICM Problem Committee, a unique blend of academicians and industry professionals with many years of mathematical modeling experience. Teams again had to be at the top of their game to excel.

The focus of Problem Y was the difficult task of determining an appropriate listing price for a sailboat faced by yacht brokers worldwide. The problem asked teams to explore the many interacting factors that influence the resale value of large items, like sailboats, to develop a model that explains the listing price of sailboats. Then teams were asked to discuss the precision of their estimates. They were specifically asked to identify any regional effects and to discuss their practical and statistical significance. To support them in this task, data was provided about sailboats listed for sale in 2020 in the United States, the Caribbean, and Europe. While teams were required to use

the data provided, they were also invited to find additional data to support their modeling and they were required to find comparable data for the Hong Kong (SAR) market. Teams then applied their model of regional effects to the Hong Kong (SAR) market. Teams were required to explain their models and conclusions in a report to a broker in Hong Kong (SAR) supported with well-chosen graphs.

For the Z Problem, teams were asked to explore the phenomenon of a decreasing number of bids to host the summer and winter Olympic Games that the International Olympic Committee (IOC) has been experiencing as cities and nations decide that the costs of hosting the games far outweigh the benefits. To do so, teams were asked to consider the impacts of hosting the Olympic Games from multiple viewpoints. Teams developed a metric, or metrics, to measure the impacts. They then had the chance to get very creative using their metric to explore options, strategies, and policies to ensure the Olympics continue to be successful in fulfilling their mission to bring the world together through sport. Finally, teams were required to explain their findings and make recommendations for the future in a memorandum addressed to the IOC.

The Outstanding solution papers will be featured on www.mathmodels.org, along with commentaries from the problem authors and judges. All 4,025 of the competing teams are to be congratulated for their excellent work and enthusiasm for mathematical modeling and interdisciplinary problem solving.

2023 Spring MCM/ICM Statistics

- **4025 Teams Participated**
- **2666 Problem Y (66%)**
- **1359 Problem Z (34%)**
- **5 Outstanding Winners (<1%)**
- **68 Finalist Winners (2%)**
- **307 Meritorious Winners (7%)**
- **834 Honorable Mentions (21%)**
- **2503 Successful Participants (62%)**
- **29 Unsuccessful Participants (<1%)**
- **278 Disqualified (7%)**
- **1 Not Judged (<1%)**

To obtain additional information about the Spring MCM/ICM and to obtain a complete listing of all team designations, please visit the MCM/ICM Website at: www.mcmcontest.com, or contact COMAP at: mcm@comap.com.

Major funding for the MCM/ICM is provided by COMAP. Additional support is provided by the Institute for Operations Research and the Management Sciences (INFORMS), The Society for Industrial and Applied Mathematics (SIAM), The Mathematical Association of America (MAA), The American Statistical Association (ASA) and The American Mathematical Society (AMS). COMAP's Mathematical Contest in Modeling and Interdisciplinary Contest in Modeling are unique among modeling competitions in that they are the only international contests in which students work in teams to find a solution. Centering its educational philosophy on mathematical modeling, COMAP uses mathematical tools to explore real-world problems. It serves the educational community as well as the world of work by preparing students to become better informed—and prepared—citizens, consumers, and workers.
